Seattle, WA | 9408433513 | [abhivarmabirru14@gmail.com](mailto:abhivarmabirru14@gmail.com) | [linkedin.com/in/abhivarma-birru](https://www.linkedin.com/in/abhivarma-birru) | [github.com/ABV14](https://github.com/ABV14)

## PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience in developing scalable and high-performant web applications with enhanced user experience. Proficient in object-oriented programming, full-stack development, database management, machine learning and AI.

## WORK EXPERIENCE

### Software Engineer

July 2024-Present

#### Neo4j - Quadrant Technologies

Redmond, WA

- Developed a data analytics platform on Microsoft Fabric using React, TypeScript, C#, Entity Framework, and PostgreSQL, ensuring efficient data processing and engineering operations.
- Optimized backend services using multithreading and concurrent processes handling large data retrieval operations and API requests.
- Designed ETL pipelines with PySpark, handling migration of 1M+ data from relational databases into graph databases.
- Leveraged Azure OpenAI LLM to generate AI-powered graph schema recommendations, resulting in optimized database schema design.
- Reduced production incidents by 25% using webhooks on CI/CD pipelines for performing unit tests and code-vulnerability scans.

### Software Engineer

December 2020 - July 2022

#### Cognizant

Remote

- Designed backend systems handling REST and GraphQL APIs using Java 17, Spring Boot and Hibernate ORM, serving 100k+ monthly client requests.
- Improved SQL server database performance and data transactions speed by 20% using data sharding and data partitioning strategies.
- Increased user experience by 40% by developing responsive and interactive cross platform web interfaces using HTML, CSS, React and JavaScript while adhering to modern front-end design principles.
- Implemented gRPC protocols and facilitated high-performance communication between microservices, reducing request latency by 15%.
- Reduced production bugs by 25% by implementing unit/integration testing using Jest and React Testing Library for UI consistency.
- Deployed containerized microservices using Docker and Kubernetes on AWS(EKS, Lambda, ECS), ensuring scalability and availability.

## OTHER EXPERIENCE

### Web Developer

October 2022 - May 2024

#### University of North Texas

Denton, TX

- Developed a scalable dining services platform using React and Java, handling over 10,000 daily transactions with 99.9% uptime.
- Leveraged AWS DynamoDB to store user preferences, ensuring efficient data retrieval and scalability.
- Designed 80+ sales visualizations per semester with tableau, generating data-driven insights for designing optimal meal plans.

### Graduate Researcher

Jan 2023 - December 2023

#### University of North Texas

Denton, TX

- Designed a stock recommendation system using Neural Networks and Transformers (DistilBERT), integrating numerical stock data with textual sentiment analysis from tweets, achieving an 82% accuracy rate.
- Developed a novel approach using deep learning models and autoencoders to create location-based embeddings from census data, significantly enhancing prediction accuracy of socioeconomic indicators compared to PCA methods.

### Full Stack Developer

September 2019 - November 2020

#### Upwork

Remote, India

- Designed and developed a housing management application using ReactJS, Python, GraphQL, and MongoDB.
- Accelerated service request processing by 15% through efficient middleware services and messaging services(AWS SQS).
- Implemented secure payment system, processing \$20k+ monthly transactions with zero security incidents.

### Application Developer

August 2018 - September 2019

#### Upwork

Remote, India

- Developed backend services for geo-informative map applications using ReactJS, Python, Flask and PostgreSQL.
- Improved scalability by 25% using Docker, Kubernetes, and SQS for streamlined microservices deployments with AWS.
- Integrated dynamic maps and real-time geospatial data, providing users with accurate information and route navigation.

## EDUCATION

### University of North Texas

Denton, TX

Master of Science, Data Science - 3.9/4.0

May 2024

## TECHNICAL SKILLS

**Programming Skills:** Java, JavaScript(ES6), TypeScript, Python, Spring, Django, Flask, FastAPI, NodeJS, ReactJS

**Databases:** MongoDB, MySQL, Microsoft SQL server, PostgreSQL, Neo4j, MongoDB, AWS DynamoDB

**Tools and Software:** Linux, Azure, AWS, Docker, Kubernetes, GitHub, GIT, Jenkins, Postman, Swagger, Webpack, Jest, Cypress

**Functional Skills:** Data Structures, Algorithms, Database Management, Operating Systems(Linux, MacOS), AI, Large Language Models
